Notice on Revision of Application for Pre-operational Confirmation of Shimane Nuclear Power Station Unit 2

On December 10, 2024, we have submitted an application, which reflected a revision of a resumption of commercial operation of Shimane Nuclear Power Station Unit 2 from January 2025 to January 10, 2025, for pre-operational confirmation in relation to an operator's pre-operational inspections to the Nuclear Regulation Authority (NRA).

On September 11, 2023, we submitted the application to the NRA^{*1} and revised the application as the process of the operator's pre-operational inspections, etc. changed^{*2}. We have now revised the resumption of commercial operation considering the reactor start-up on December 7 and the perspective on the process of inspections that takes place before the resumption of commercial operation.

Also, a restart is planned to December 25, 2024.

We will continue to take all possible measures with safety as our first priority to ensure the operator's pre-operational inspections proceed steadily as well as to respond appropriately to the pre-operational confirmation conducted by the NRA, and we will carefully prepare each and every step such as facility inspections and examination, etc. toward the restart and the resumption of commercial operation.

There will be no impact on the full-year earnings forecasts (consolidated and non-consolidated) for the fiscal year ending March 31, 2025.

*1 This matter was disclosed in “Notice on Submission of Application for Pre-operational Confirmation of Shimane Nuclear Power Station Unit 2” on September 11, 2023.

*2 These matters were disclosed on April 30, October 15, and November 11, 2024, respectively, in “Notice on Revision of Application for Pre-operational Confirmation of Shimane Nuclear Power Station Unit 2”.
