

We have made revisions to the CO₂ emission factors for FY2022 that we reported to the government in accordance with the Act on Promotion of Global Warming Countermeasures, because some errors were found in our calculations (for details, please refer to the "Notice", only Japanese).

In accordance with this, the following figures in the presentation materials for FY2023 financial results has also been corrected.

Correction part	Correction details										
<p>Page 32 Basic Policy of Chugoku Electric Power Group Carbon Neutral Strategy (1/2)</p>	<p style="text-align: center;">CO₂ emissions [10,000 t-CO₂]</p> <table border="1"> <caption>CO₂ Emissions Data</caption> <thead> <tr> <th>Year</th> <th>CO₂ Emissions [10,000 t-CO₂]</th> </tr> </thead> <tbody> <tr> <td>FY2014</td> <td>4,228</td> </tr> <tr> <td>FY2022</td> <td>2,553</td> </tr> <tr> <td>FY2031</td> <td>1,835</td> </tr> <tr> <td>2050</td> <td>2,527</td> </tr> </tbody> </table> <p style="text-align: center;">(After corrected) 2,527</p> <p style="text-align: right;">(After corrected) 0.536kg-CO₂/kWh</p> <p>[Benefits of operating large-scale power sources] Simulation based on the data of results from FY2022 Shimane Units 2 and 3 -6.6 million t/year</p> <p>[Main Assumptions of benefits of operating large-scale power sources] Shimane Unit 2.3 : Assessed as an alternative power source to those with a CO₂ emissions factor of 0.542 kg-CO₂/kWh in FY2022. Facility utilization ratio 70% (Source: Power Generation Cost Verification Working Group Report (September 2021))</p> <p>■ Emissions from retail business CO₂ emissions from our own power sources as well as electricity received from other companies including market procurement involved in our retail business</p> <p>■ Emissions from power generation business CO₂ emissions directly from our own power sources involved in our power generation business</p> <p>Note: Adjustment related to FIT, CO₂ emissions credits, and the like based on the Act on Promotion of Global Warming Countermeasures and the like have been reflected in the CO₂ emissions in our retail business. The CO₂ emissions for FY2014 results are values that include supply to isolated islands. The CO₂ emissions for the power generation business are those values reported based on the Act on Rationalizing Energy Use which are directly emitted from our own power sources.</p>	Year	CO ₂ Emissions [10,000 t-CO ₂]	FY2014	4,228	FY2022	2,553	FY2031	1,835	2050	2,527
Year	CO ₂ Emissions [10,000 t-CO ₂]										
FY2014	4,228										
FY2022	2,553										
FY2031	1,835										
2050	2,527
