

Main Material/Equipment

- The Chugoku Electric Power Transmission & Distribution Company, Inc. is seeking suppliers who wish to supply materials and equipment such as those items indicated below.
- Suppliers who wish to become a new supplier or have inquiries regarding becoming a new supplier should fill in the required items of the request form and send it to our company.
- We accept applications from manufacturers outside of Japan if made through their Japanese sales agent or distributor.
- Information and other submitted items will be comprehensively reviewed, and manufacturers or their sales agent or distributor deemed to be a possible supplier will be contacted by our company at a later date.

Transmission and Distribution Equipment	Transformers	Gas insulated switchgear (GIS)	Circuit breaker
	Disconnecting switches for electric power	Potential Transformer	Current transformer
	Power capacitors	Power reactors	Neutral earthing resistors
	Hoe line insulator washer	Steel structures	Steel towers
	Switchboards	Protectors	Computers for control application
	Equipment supervision system	Pole transformer and switches	Concrete poles
	Insulators	Underground switches	Various power distribution materials
	Watt-hour meter	Aerial line hardware	Other related equipment
Electronic Communication Equipment	Parabolic reflector antenna and accessory equipment		Radio equipment
	Optical terminal equipment	Electronic switching systems	Other related equipment
Wires/Cables	Aluminum wire and connection materials	Aluminum pipe bus	Optical fiber cable
	Optical ground wire	Bare copper wire	Control-use Vinyl insulated Vinyl sheathed cable
	Signal cable	Oil filled cable	Cross-linked polyethylene insulated vinyl sheath cable
	Others		
General Equipment/Materials	Steel frame	Steel pipe pile	Cranes
	Elevator	Uninterruptible power supply systems	Battery
	Electronic computers	Measuring equipment	Industrial chemicals
	Others
